

River LED Spot

User manual

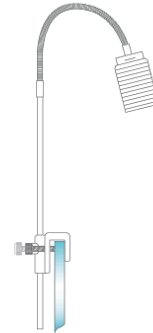

EN

Function

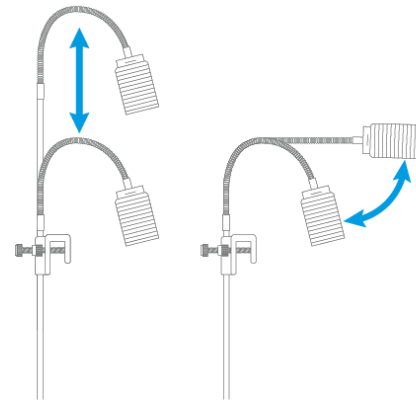

Aquarium LED spotlight with timer, dimmer and adjustable light beam with three light colours for beautiful lighting accents. Suitable for open aquariums with a glass thickness up to 15 mm.

Installation

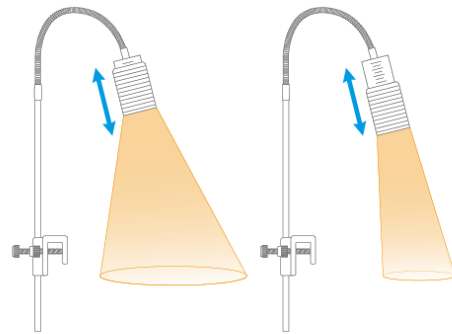

Attach the lamp clamp to the aquarium glass and tighten it securely. Connect the cable of the lamp to the adapter and put the plug in the socket.

You can adjust the height of the lamp, and the flexible arm allows you to direct the light in any direction.

The beam can be adjusted by rotating the lampshade backwards for a wide beam or forwards for a narrower, focused beam.

Operation

The lighting is fitted with a controller offering the following functions:

- **(A)** On/Off.

- **(B)** Timer.

To set the timer, the spotlight must be switched on. Set the timer by pressing the switch and choose between 3 hours (indicated by a blue led)/9 hours (green led)/12 hours (red led) or continuous (no led).

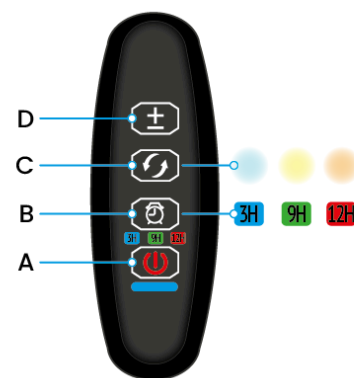

The timer switches the lighting on and off at the same time every day for the selected duration. The set duration begins immediately and repeats automatically every day.

- **(C)** Light colours.

Three different lighting atmospheres (cool, neutral and warm), choose by pressing the switch.

- **(D)** Dimmer.

Set the light intensity in 10 levels by pressing the switch.
